

Integrative Solutions

For Allergies, Asthma, ADHD, Autism & more...

Seemingly unrelated disorders like allergies, asthma, ADHD, anxiety, dyslexia, learning delay, digestive disorders and Autism are actually connected. Medical research indicates that a range of illnesses are linked by overlapping Metabolic, Immuno, Neuro, Digestive and Developmental issues. Addressing underlying deficiencies, infections and toxicity can improve health, behaviour and concentration while reducing the need for medications and the risk of disease. Selecting and sequencing appropriate treatments is essential for best outcomes and saves time and money.

Regional Seminars 2010

23 May	Perth	WA
30 May	Newcastle	NSW
6 June	Melbourne	VIC
27 June	Gold Coast	QLD
15 August	Central Coast	NSW
22 August	Canberra	ACT
28 August	Townsville	QLD
12 September	Adelaide	SA
19 September	South Coast	NSW
17 October	Sydney	NSW
13 November	Darwin	NT

Did you know?

- 1 in 5 Australian children have food allergies.
- 1 in 6 Australian children have a learning, behavioural or immune disorder.
- 1 in 100 US, 1 in 150 UK and 1 in 120 Australian children are diagnosed with Autism.
- Food allergies and intolerances are often misdiagnosed as ADHD or learning & behavioural issues.
- Children with learning delay may have auditory or visual processing deficits not detected in standard tests.
- 70% of the neurotransmitters in your brain are also in your digestive tract.
- A healthy diet is not enough if the gastro intestinal tract is not absorbing nutrients.
- Seemingly healthy foods like milk, bread, soy, egg and corn can adversely affect concentration, behaviour and immunity in someone with metabolic and/or digestive disorder.
