

Mindd International Forum On Children 2007

ADHD
Asthma
Allergies
Autism
Learning Delay

Lectures & Expo on
Health and Education

18-21 May 2007
Australian Jockey Club
Randwick Sydney

Discover new treatments
that improve health
and concentration

Healthy Cells For Life™

For Health Professionals, Educators and Parents

Are you concerned about the health,
behaviour or learning of a child in your life?

Learn from international and local experts
on addressing core causes through
biomedicine, nutrition, neurodevelopmental
and complementary therapies.

RACGP QA & CPD points
for General Practitioners

Metabolic
Immunologic
Neurological
Digestive
Disorders

Discover what treatments
and products international
experts recommend

Did you know?

- Many learning and behavioural disorders are linked to digestive disorders
- Nutritional deficiencies create an imbalance in neurotransmitters which can affect behaviour, concentration, mood, sleep and addictions.
- Many children with learning delay have auditory and/or visual processing issues that do not show up on standard hearing and vision tests

Featured Speakers Learn from the World's Best Minds

International experts will train professionals on the biology of neuro-developmental and neuro-biological disorders and cover specific medical and therapeutic treatments that reduce or eliminate phenotypic behaviours, reduce oxidative stress, control infections, boost immunity and promote neuro-development.

Parents will learn the fundamentals critical to managing their child's health including proper selection and sequencing of treatments for the individual child.

Educators will gain an understanding of environmental factors impacting neuro-development and that a greater focus on biochemistry and neuro-development is required as a precursor to literacy and numeracy.

1 in 6 Australian children have learning, behavioural, or immune disorder*

1 in 4 Australian children are diagnosed with asthma (over a 100% increase in 10 years)*

Autism effects 1 in 165 children in the US** and 1 in 155 in the UK.***
